NICHOLAS MARCELO CURBELO

1548 Buckingham Dr, Windsor, ON | N8T 2A4 Cell: (382) 880-0834 | Email: n_mc@live.ca

SKILLS

•Cold Calling & Lead Generation
•GoHighLevel CRM
•Etsy & Shopify
•Google Ads
•Google Analytics
•Fullstack Web Development
•PostgreSQL
•Amazon AWS
•Adobe Suite
•TIA Portal WINCC
•Studio5000 (Allen Bradley)
•Machine Vision Systems (Cognex, Keyence)
•Fusion360

WORK EXPERIENCE

Forgelo Tech — Windsor, ON
Owner/Operator — Feb. 2025 – Present

- Create, host, and maintain websites for the business, optimizing them for SEO to drive organic traffic
- Build automations to streamline business operations and lead follow-up
- Conduct my own outreach and build my own sales pipelines to generate leads
- Run and manage my own paid ad campaigns, achieving a 2.0 ROAS

Global Vehicle Systems – Tilbury — Tilbury, ON
Controls Engineer Technologist (Intern) — May 2024 – Sept. 2024

- Program Siemens S7-1200 PLC using TIA Portal v19. Successfully integrated with CUBE67 PROFIBUS, WinCC HMI, Keyence IV3 machine vision system and FANUC Robot
- Communicate with Project Manager, Mechanical team, and Engineering Lead about project updates.
- Use schematics to plot I/O and SolidWorks with PDM to view components and analyze robotic cell
- Train Keyence IV3 Camera to interpret pass/fail models of product based on customer specifications.
- Code PLC Logic following Customer-Handoff guidelines regarding sequence of operations (cycle, timers, lights), mechanical components (sensors and actuators), and safety procedures (light curtains, gates, EStops)

St. Clair College — Windsor, ON
Teaching Assistant (Contract) — Oct. 2023 - Dec. 2023

- Instructed an 8-week STEM LEGO program to local Windsor-Essex Elementary and Secondary Schools.
- Teach students robotic applications in modern living via lectures and python code block learning activities
- Demonstrating theoretical applications of how programming can control micro-controllers via Wi-Fi protocol to enable actuation, mechanical motion and automation of complex tasks.
- Instructed group exercises on building, programming, and troubleshooting Lego RC cars, guiding students through the assembly, coding and troubleshooting process.

ProWash and Property Care — Windsor, ON
Owner/Operator — 2021 – 2023

- Generate B2C leads through Facebook ads, door-to-door flyers, and website signups, driving business growth and customer engagement throughout the summer months
- Use heavy machinery such as tampers, augers, hand tools, measuring tools, drills to complete yard renovations, ensuring high-quality results and customer satisfaction
- Quote jobs, providing competitive pricing, ensuring profitability and aligning with customer needs
- Develop and maintain strong relationships with clients, fostering repeat business and referrals through excellent customer service, reliability, integrity of work and attention to detail
- Oversee marketing strategies and business expansion efforts to grow and attract new local clients

SP Data Digital — Windsor, ON
Telesales Agent (Remote) — Oct. 2021 – Oct. 2022

- Perform sales calls for warm leads on a **B2C** relationship, selling tele-communication devices and add-on services best suited for customer needs, and resolving general customer inquiries.
- Address time-sensitive issues such as payments, account questions, client issues, using CRM’s
- Coach new agents to skillfully generate leads and engage with clients for success
- Achieved top sales performer recognition for exceeding monthly targets during employment tenure.

References Available Upon Request

A.P Plasman — Windsor, ON

Machine Operator — Nov. 2019 – Mar. 2021

- Operate and monitor Injection Moulding machines via HMI. Troubleshoot basic machine issues, adhere to quality control guidelines for quality inspection in reference to common injection mould defects.
- Working with heat guns and measurement tools such as micrometers, calipers, and metric gauges
- Assemble, Inspect and Pack each finished part adhering to KPI standards by referring to quality standards.
- Adhere to **lean manufacturing** like production targets and making small adjustments to boost productivity.

EDUCATION

St. Clair College – Electro-Mechanical Engineering Technologist (Part-Time) — Windsor, ON

- Graduate December 2026 — Jan. 2023 - Dec. 2026

Projects

Flex Cell — Jun. 2024 – Aug. 2024

- Implemented and integrated **S7-ET200SP** series PLC with **WINCC** Unified Panel, and **IRB 1300** series **ABB** Robot using Siemens TIA Portal IDE
- Designed HMI GUI and setup operator functionality with PLC\ Integrated Modular fieldbus system to control mechanical components (sensors, clamps, solenoids, dump valves) in accordance to sequence.
- Trained Pass/Fail Models for **Keyence IV3** Machine Vision System to identify Clip Present Pass/Clip Present Fail Assembled automotive parts.
- Reading Electric Schematics to identify I/O and troubleshoot errors

MPC 2.0L FWD Intake Leak Tester — May 2024 – Jun. 2024

- Designed HMI GUI for **NS8** series OMRON HMI and integrated with **NX102-9020** OMRON PLC
- Tested automated leak detection system, ensuring accurate pressure testing and integrated system feedback with PLC for real-time data monitoring
- Assisted Controls Team in optimizing test parameters and cycle times for leak detection system, such as increasing air pressure to decrease actuation time of compression cylinders by 5 seconds

Volunteer Experience

Border City Boxing Club — Windsor, ON

Volunteer Coach — June 2025 – Present

- Coach a recreational youth boxing class every Saturday for kids aged 8-14
